'A true blockbuster; an unprecedented, unique encyclopedia comprehensively surveying what has clearly become a major academic discipline.'

Reference Reviews

'This is a landmark publication in the history of translation studies . . . it is impossible to do justice to this encyclopedia's many merits.'

Language Today

'Interest in translation studies as an academic discipline has never been greater, and this excellent volume is to be commended for bringing together some of its most recent research . . . '

The Times Higher Education Supplement

'up-to-date, open-minded and authoritative'

Published in paperback for the first time, the acclaimed Routledge Encyclopedia of Translation Studies is the ideal reference work for anyone with an academic or professional interest in translation.

Drawing on the expertise of over 90 contributors from more than 30 countries, the *Encyclopedia* offers a detailed overview of translation studies.

Part I covers the conceptual framework of the discipline, with topics including:

- drama, literary and poetry translation
- machine translation
- terminology and term banks

Part II presents over 30 entries on the history of translation in major cultural and linguistic communities worldwide.

As user-friendly as it is comprehensive, the Routledge Encyclopedia of Translation Studies is a ground-breaking work that has proved invaluable to students, teachers and professional linguists.

Mona Baker is Professor of Translation Studies and Director of the Centre for Translation and Intercultural Studies at UMIST, UK. Her publications include In Other Words (1992) and she edits the international journal The Translator.
